

WORRIED ABOUT YOUR COMPANY'S RISK?

Our **10 Layer Security Suite** is a cloud based protection service designed to take the stress out of managing your company's security.

The suite is comprised of industry leading vendors, including Gartner Magic Quadrant leaders in their specialist fields, representing one of the most comprehensive managed suites available today.

RELAX, WE'VE GOT YOU COVERED.

01. EMAIL SECURITY & CONTINUITY
Our cloud based Email security service ensures continuity, blocks email borne threats at the gateway and helps to prevent data leakage from your organisation.

02. WEB FILTERING
Our secure internet usage service drastically reduces malware threats, prevents visitation to dangerous websites and allows for granular control over specific sites with comprehensive reporting.

03. NEXT GENERATION FIREWALL TECHNOLOGY
Our NextGen Firewall service delivers real time threat detection to stop zero-day threats at the perimeter, provides point to point encrypted access for remote users and allows for application intelligence and control to deliver performance where it is needed.

05. BREACH DETECTION
Threats can slip through the toughest security systems. Our breach detection service constantly scans your systems for program anomalies and delivers prioritised remediation recommendations to remove any persistent threat applications.

06. CREDENTIAL THEFT MONITORING
Our credential theft service proactively monitors the Dark Web for stolen credentials that may put you or your clients' data at risk. Be forewarned and stay ahead of the threat.

10. SECURITY AWARENESS EDUCATION
No matter what levels of security you have in place, if your team cannot identify a threat it may all be for nothing. We pride ourselves on continuously educating clients via our Service Desk each day and with tailored presentations by our consultants at your request.

04. ENDPOINT PROTECTION
Our cross-platform Enterprise grade Antivirus service is maintained in real time via a cloud based threat intelligence centre, delivering zero-day threat protection, in the office or on the road 24x7

07. DISASTER RECOVERY
Downtime cost is huge. We put great emphasis on ensuring you are up and running as soon as possible. Automated backup routines to a secure cloud location, tailored to your business recovery parameters, and the ability to operate your replicated infrastructure in a virtual cloud minimises disaster impact on your business.

08. GROUP POLICY
A sophisticated portfolio of Active Directory Policies prevents the execution of unapproved applications, forcing compliance with Company IT security policies.

09. MANAGED IT SERVICE
We continuously invest heavily in our people and technology to ensure management of your systems remain best-of-breed, and with over 100 years collective IT experience in our team, we know how to keep you operating as effectively as possible.
